1
L462

N. 1 1 Gennaio 1983

pag.

1 G. Viesti, M. Pavanati and A. M. Stefanini – Calculation of heavy-ion energy loss and energy loss straggling in carbon foils.

7 G. C. Joshi and P. Williams – On the quark and lepton form factors.

11 S. D. P. Vlassopulos – Simple hadronization model restoring on-shell unitarity in hard-scattering processes.

16 S. Antoci – Stationary axially symmetric solutions of the Hermitian theory of relativity: generalization of the Papapetrou class of vacuum fields.

21 M. Bartuccelli – The generalized Burgers' equation in radiative magneto-gasdynamics.

27 E. Ficocelli Varracchio – Ideal-space representation of chemical reactions.

N. 2 8 Gennaio 1983

pag.

33 C. Maccone – On the fractional Brownian motions $B_{LH}(t)$ and on the process $B(t^{2H})$.

35 F. Salmistraro – A note on Killing tensors in vacuum space-times.

39 O. Costa de Beauregard – Is the deterministically evolving state vector a misleading concept?

41 A. Jannussis, G. Karayannis, P. Panagopoylos, V. Papatheou, M. Simeonidis, D. Vavoygis, P. Siafarikas and V. Zisis – Time-dependent quadratic Hamiltonian and the Heisenberg uncertainty principle.

44 A. Delunas, V. Maxia and G. Spano – On the quartz thermoluminescence.

N. 3 15 Gennaio 1983

pag.

49 E. Triantafillopoulos – The $\mathcal{N}$ and Δ_δ trajectories in the triple-Regge limit.

55 R. Rodenberg – Common footing of the supersymmetric U-boson and of second-class currents.

60 P. Chiarelli, S. Faetti and L. Fronzoni – Experimental measurement of the director orientation at the free surface of a nematic liquid crystal.

N. 4 22 Gennaio 1983

pag.

65 S. Minami – A mixing model for the 0^{+-} glueball and the $q\bar{q}$ meson.

69 C. E. M. Aguiar, J. A. Martins Simões and C. A. Garcia Canal – Bottom production mechanism for same-sign dileptons.

pag.
75 B. S. Rajput, S. R. Kumar and O. P. S. Negi – Quaternionic formulation for dyons.
79 G. Bardin, J. Duclos, A. Magnon, J. Martino, A. Bertin, M. Capponi, M. Piccinini and A. Vitale – Experimental study on the nuclear synthesis of dμd molecular ions by means of the time distribution of the released neutrons.
86 F. Asai – Instability of the nuclear $^1S_0$ superfluid state for neutral-pion condensation.
91 N. Lo Iudice and F. Palumbo – Spin-isospin collective excitations in light oblate nuclei.
96 W. I. Fuschich and W. M. Shtelen – The symmetry and some exact solutions of the relativistic eikonal equation (Erratum).

N. 5 29 Gennaio 1983
pag.
97 M. Gentili, I. Massa, G. Vannini, P. Boccaccio, F. Reffo, R. A. Ricci and I. Iori – Evidence of an angular dependence of the fissionlike fragmentation for the $^{32}S+^{59}Co$ system at 5 MeV nucleon.
102 F. Aramu, V. Maxia, S. Serci and I. Uras – Mössbauer study of Mount Arci (Sardinia) obsidian.
105 G. Schäfer – On often used gauge transformations in gravitational radiation-reaction calculations.
109 M. Hortaçsu – Index theorem for merons.
113 Nguyen Tang – Nonequilibrium thermodynamical relations of homogeneous systems.
120 J. Blandin, R. Pons, J. Skinazi and G. Marcilhacy – General solution of the Clemmow differential equation in a relativistic cold plasma.
125 R. Giordano, F. Porto, S. Sambataro and A. Scalia – Heavy-ion fusion and its connections with elastic scattering.

N. 6 5 Febbraio 1983
pag.
129 V. D'Amico, G. Giardina and A. Strazzeri – Equilibrium and nonequilibrium sequential emission of light particles in deeply inelastic collision.
135 N. Arena, C. Barbagallo, Seb. Cavallaro, P. D'Agostino, G. Fazio, G. Giardina and F. Mezzanares – The 4.3 MeV ^{6}Li state width deduced from the $^7Li(^3He, \alpha d)\alpha$ reaction at $E_{^3He} = 2.5$ MeV.
141 T. Suzuki – Emergence of wave packets in nuclear collisions.
145 P. Christillin – Distortion effects in quasi-elastic electron scattering on nuclei.
149 Liu Lian-sou – On the approximate scaling and scaling violation of inelastic multiplicity distribution.
156 V. De Sabbata and M. Gasperini – Hermitian gravity and supergravity.

N. 7 12 Febbraio 1983
pag.
161 J. P. Hsu – Generalized gauge fields for external-symmetry groups and gravity.
167 L. S. Levitt – The spin kinetic energy and intrinsic mass of elementary particles. - II: Massless particles.

pag.
171 L. S. Levitt – The spin kinetic energy and intrinsic mass of elementary particles. - III: Hyperons and nucleon resonances as high-spin nucleons.
174 S. A. Bonometto, F. Lucchin and S. Matarrese – The quark-hadron phase transition and the temperature of the MW background radiation.
177 G. Cevolani and A. Dardi – A coupling phenomenon between mesospheric wind patterns and midwinter stratospheric warmings: preliminary results.
188 W.-H. Steeb and W. Erig – On the constants of the motion of a generalized Lotka-Volterra model.
193 V. Benza, E. Montaldi and M. Ciftan – Dynamical approach to superradiance through vacuum instability.
200 S. Giambò and P. Pantano – Wave interaction in radiative gas dynamics.
205 B. Ram and R. Leon – Meson spectra with the power law potential in the Dirac equation.

N. 8 19 Febbraio 1983
pag.
209 P. Pantano – Inhomogeneous dispersive and dissipative nonlinear transmission lines and solitons.
215 C. Destri, C. A. Orzalesi and P. Rossi – Origin and fate of Kaluza-Klein mechanisms.
221 L. H. Greenberg, D. Y. Kim, S. I. H. Naqvi and R. E. Pywell – Evidence for the existence of a low-mass pseudoscalar meson.
226 R. Rodenberg – Influence of a light supersymmetric U-boson on Z-U Mixing.
231 R. Grisenti, S. Oss and A. Zecca – Nonexistence of a positron–hydrogen-atom bound state.
236 M. Geddo, D. Maghini, A. Stella and C. Calligarich – New achievements of electroreflectance to study doping inhomogeneities in semiconductors.

N. 9 26 Febbraio 1983
pag.
241 R. T. Bush – A theory of particle interference based upon the uncertainty principle. - II: Additional consequences.
245 S. S. Ahmad – On the origin of a differential method for the Jost formulation of separable potentials.
249 R. Jones – Negative-resistance characteristics of a Langmuir probe in a turbulent plasma.
255 G. Ziino – More about three-dimensional time and wave mechanics: a reply to Strnad.
261 M. DerSarkissian – Evidence for a quark hard core.
266 Michio Nishioka – Local gauge transformat on and symmetric connection in space-time.
269 A. Strumia – Conservative equations for viscosity and heat conduction in relativistic hydrodynamics.
274 M. Ceccarelli – On the existence of the Universe.
275 Y. Brihaye – Non-Abelian plane waves in the Higgs model.
279 J. Cugnon and O. Harouna – Density of a many-fermion system in a harmonic-oscillator potential.
284 F. Weber, M. K. Weigel and J. Winter – Nuclear-matter calculations within the quasi–Hartree-Fock theory.

N. 10 5 Marzo 1983

pag.

289 E. Tosatti and M. Parrinello – Outline of a theory of the two-dimensional Hall effect in the quantum limit.

299 R. Jones – Anode tufting, arc faulting and plasma nonuniformity in ion sources.

303 M. Basile, G. Bonvicini, G. Cara Romeo, L. Cifarelli, A. Contin, M. Curatolo, G. D'Alí, C. Del Papa, B. Esposito, P. Giusti, T. Massam, R. Nania, F. Palmonari, G. Sartorelli, G. Susinno, L. Votano and A. Zichichi – Deep inelastic scattering and soft (pp) interactions: a comparison.

307 A. Sym – Soliton surfaces. - II: Geometric unification of solvable nonlinearities.

313 U. Villante and F. Mariani – The latitudinal dependence of the IMF polarity during 1975-1981.

316 A. Toda – Flavour symmetry of hadrons and nonleptonic decays of charmed D-mesons.

N. 11 12 Marzo 1983

pag.

321 A. Săndulescu, R. Y. Cusson and W. Greiner – Time-dependent Hartree-Fock study of alpha decay.

325 T. Theocharis – On Maxwell's ether.

333 Chien-er Lee, Yeou Wei Yang and T. H. Wong – A new power series for the charge multiplicity.

340 St. Mrówczyński – On the phase space of tachyons.

343 P. Caldirola – On the masses of charged and neutral leptons.

347 S. Iwao – Multiplicity distributions in annihilation and decay processes.

354 C. Pajares and A. V. Ramallo – A-dependence of diffractive processes.

359 M. Baldo, F. Catara, E. G. Lanza, U. Lombardo and L. Lo Monaco – Pairing correlation effects on the mass transfer in deep inelastic collisions between heavy ions.

364 H. Aspden – The Lamb shift for a cavity-resonant electron.

N. 12 19 Marzo 1983

pag.

369 M. Clausse and J. Heil – Diffuse phase inversion, percolation and bicontinuous structures in microemulsions.

377 F. Thieffine – Compatible complement in Piron's system and ordinary modal logic.

382 J. M. Wilkes and J. D. Zund – A new form of the Hauser type-N solution in general relativity.

385 P. Caldirola – On the Schrödinger equation for a class of open systems.

389 H. Sakuyama and K. Watanabe – Heavy particle with long life in cosmi-rays above 10^{17} eV.

393 R. C. T. da Costa – Constrained particles in quantum mechanics.

397 K. G. Akdeniz and M. Hortaçsu – A meron determinant calculation.

N. 13 26 Marzo 1983

pag.

401 N. Fleury, J. Leite Lopes and D. Spehler – Do spin-$\frac{3}{2}$ leptons exist?

pag.
409 G. Alberi, A. Malecki and V. Roberto – Cross-sections and multiplicities in pα and αα collisions at very high energies.
417 P. Achuthan and S. Benjamin – Exact solution of the Dirac equation for an inhomogeneous magnetic field.
421 T. Egusa – Dip-bump structure of high-energy π^-p elastic scattering.
428 M. Carmeli – Extension of the principle of minimal coupling to particles with magnetic moments.
431 C. Costa, H. Gruppelaar and J. M. Akkermans – Energy dependence of pre-equilibrium angular distributions.
438 G. Giaquinta and C. Di Mauro – On the vortex-antivortex pair dissociation in two-dimensional superconductor.
441 F. Alonso, J. Julve and A. Tiemblo – One-loop divergencies of nonpolynomial locally invariant Lagrangians.
445 J. Proriol – Contribution of the inelastic correction to the total cross-section for π-^{4}He elastic scattering at 40.4 GeV.
447 F. Calogero – Lagrangian interpolation and differentiation (Erratum).

N. 14 2 Aprile 1983
pag.
449 D. Fargion – Loss of angular momentum in a binary system due to collisionless particles as monopoles or gravitons: does it exceed the gravitational radiation emission in the binary system PSR 1913 + 16?
453 T. F. Nonnenmacher, G. Dukek and G. Baumann – On the nonlinear Schrödinger equation and its fluid-dynamical form.
457 D. de Falco, S. De Martino and S. De Siena – Momentum from sample paths in stochastic mechanics.
461 G. Pisent – A finite algorithm for the R-matrix description of nuclear resonances.
467 E. Alvarez and M. B. Gavela – Supersymmetric equilibrium.
471 R. Benzi, L. Peliti and A. Vulpiani – Fractal dimensions and $1/f$ noise.
475 G. Calvi, M. Lattuada, C. Spitaleri, F. Riggi, D. Vinciguerra, C. M. Sutera and A. Pantaleo – Continuous spectra of deuterons from ^{3}He+^{12}C at low energy.

N. 15 9 Aprile 1983
pag.
481 M. Jaminon – Tensor component of the relativistic field in nuclear matter.
483 A. D'Amico, G. Fortunato, G. Petrocco and G. Guarini – Pd-SiO_2-GaAs MIS diode for hydrogen detection.
487 E. R. Caianiello, G. Scarpetta and G. Marmo – Quantum geometry and quantum force: wave and geodesic equations.
491 J. C. Anjos, A. F. S. Santoro and M. H. G. Souza – pp Production cross-sections and the constraint method.
495 G. Baldacchini, G. P. Gallerano, U. M. Grassano and F. Lüty – New absorption band in the near IR assigned to a bound triplet state of the F' in NaI.
499 D. S. Bhakuni, O. P. S. Negi and B. S. Rajput – Angular-momentum operators for dyons.
503 J. Andrade e Silva, F. Selleri and J. P. Vigier – Some possíble experiments on quantum waves.

pag.
509 R. Horodecki – Superluminal singular dual wave.
512 R. Giordano, F. Porto, S. Sambataro and A. Scalia – Fusion cross-section from modified SOD method (Erratum).
512 D. S. Kulshreshtha and R. S. Kaushal – Beauty mesons in the two-step potential model (Erratum).

N. 16 16 Aprile 1983
pag.
513 M. Sebhatu – $^1S_0$-state nucleon-nucleon phase shifts due to solitary-wave exchange potentials.
519 V. Glaser and A. Martin – Comment on the paper: « Necessary conditions on potential functions for nonrelativistic bound states » by Gerald Rosen.
521 F. Selleri – Einstein locality and the $K^0\overline{K}^0$ system.
527 R. Bhandari – The ωn cusp in π^-p elastic differential cross-section.
533 M. Banai and B. Lukács – Elementary particles as mass eigenstates of quantum-relativistic particles.
539 C. Di Mauro and G. Giaquinta – Topological excitations and specific-heat anomalies in 2D superconductors.
544 S. S. Ahmad – On the origin of a differential method for the Jost formulation of separable potentials (Erratum).

N. 17 23 Aprile 1983
pag.
545 A. D. Jannussis, G. N. Brodimas, V. Papatheou and A. Leodaris – The Caldirola-Montaldi procedure and the Q-analysis are noncanonical theories in time.
551 S. Minami – Remarks on the φφ enhancement observed in $\pi^-p \to \varphi\varphi n$.
555 G. Bonvicini, G. Cara Romeo, L. Cifarelli, A. Contin, M. Curatolo, G. D'Alí, C. Del Papa, B. Esposito, P. Giusti, T. Massam, R. Nania, G. Sartorelli, G. Susinno, L. Votano and A. Zichichi – Measurement of forward and backward mean charged-particle multiplicities in high-energy (pp) soft interactions and comparison with high-energy neutrino and antineutrino deep inelastic scattering.
560 T. K. Kuo and N. Nakagawa – Mass splitting between the supersymmetric partners of quarks and leptons.
563 J. Berbiers, G. Bonvicini, G. Cara Romeo, L. Cifarelli, A. Contin, M. Curatolo, G. D'Alí, C. Del Papa B. Esposito P. Giusti, T. Massam, R. Nania, G. Natale, F. Palmonari, G. Sartorelli, G. Susinno, L. Votano and A. Zichichi – Evidence for the same two-particle correlations in rapidity space in (pp) collisions and (e^+e^-) annihilation.
569 A. Strumia – The equations of nonlinear electrodynamics as a conservative symmetric-hyperbolic system in generalized co-ordinates.
574 K. L. Chang – Magnetic-charge conjugation and the topological nature of magnetic monopole.
579 A. F. Grillo and Y. Srivastava – Fermion-induced monopole-antimonopole annihilation.
583 R. O. Barrachina and C. R. Garibotti – Low-energy scattering of charged particles.

pag.
587 V. Bellini, V. Emma, S. Lo Nigro, C. Milone, G. S. Pappalardo, E. De Sanctis, P. Di Giacomo, C. Guaraldo, V. Lucherini, E. Polli and A. R. Reolon – Fission of Bi induced by a quasi-monochromatic photon beam at energies from 100 MeV to 280 MeV.

N. 18 30 Aprile 1983

pag.
593 A. R. Osborne, A. Provenzale and L. Bergamasco – The nonlinear Fourier analysis of internal solitons in the Andaman Sea.
600 C. Lo Surdo – On the plasma-vacuum condition in the energy principle of Bernstein *et al.*
603 S. Iwao – Structure functions of flavoured heavy hadrons in weak semi-leptonic decay.
609 A. Strumia – Main field and symmetric-hyperbolic form of the Dirac equation.
614 Jia-Zhu Wang – The renormalized coupling constant in an open static Einstein universe.
619 D. S. Kulshreshtha – Glueballs in the two-step potential model.
